PROFESSIONAL EXPERIENCE

UrgentIQ, New York City, NY
Chief Technology & AI Officer *Jan. 2024- Present*

- Led technical and product due diligence, successfully meeting investor requirements and contributing to a $15M Series A financing round at a $62M company valuation
- Lead AI transformation by architecting autonomous agentic workflows, increasing engineering delivery velocity by 85%
- Directed engineering & product strategy, scaling platform from 1 to 47 clinics within 11 months
- Architected and built AI Jarvis, an engineering automation platform integrating MCP servers, autonomous testing agents, and root-cause analysis agents, reducing defect investigation time from multiple meetings to under one minute
- Oversee cross-functional engineering, product, data science, DevSecOps, QA, and UI/UX teams, managing 16 engineers while fostering professional development and a high-performance engineering and product culture
- Modernized cloud infrastructure and implemented production reliability best practices, achieving uptime of 99.94% while reducing AWS costs by $30K
- Designed and built AI-powered E/M coding assistant that recommends CPT codes, improving billing efficiency by 72%

Sakara Life, New York City, NY
Director of Software Engineering *Nov. 2022- Jan. 2024*

- Directed a 40-person engineering organization spanning engineering managers, full-stack, mobile, web, and DevOps teams, driving technical strategy for a $150M+ ARR e-commerce company
- Restructured a 40+ engineer organization into cross-functional product teams aligned with strategic priorities, optimizing staffing and reducing annual personnel costs by $1.6M
- Designed and launched an AI-powered personalization engine delivering tailored meal recommendations and upsell opportunities, generating $8M in annual recurring revenue
- Strengthened enterprise risk management and cybersecurity posture, securing a 200% increase in cyber insurance coverage from $1M to $3M

CipherHealth, New York City, NY
Engineering Manager, Platform *Aug. 2021 – Nov. 2022*

- Managed a cross-functional team of 8 engineers to architect and launch an automated patient screening platform, delivering over $3M in cost savings for hospitals
- Architected and built scalable microservices for the EHR Activation Gateway, reducing blocked messages from 24,997 to just 2 per month while achieving a 98% message delivery success rate
- Spearheaded development of an AI-powered clinical summarization platform, generating actionable insights from patient rounding data and improving nursing efficiency by 76%
- Partnered with product, marketing, and customer success leadership to align engineering priorities with business objectives and drive execution of strategic initiatives

Emme Inc (*acquired by SimpleHealth*), San Francisco, CA
Engineering Manager, Platform *Nov. 2020- Aug. 2021*

- Drove engineering development and launch of EmmeRx's first telemedicine and pharmacy delivery platform, expanding the company's digital healthcare capabilities
- Aligned technology strategy and engineering roadmaps with executive business priorities, contributing to Emme's successful acquisition by SimpleHealth
- Served as Chief Security Officer, driving HIPAA compliance, SOC 1 and SOC 2 audit readiness, and successfully passed third-party security assessments and penetration testing
- Managed a team of engineers to develop the Emme Smart Case, an IoT-enabled device connected to a mobile application via Bluetooth Low Energy (BLE) technology

E-Health Now, Jersey City, NJ
Engineering Manager, Platform *Oct. 2018- Nov. 2020*

- Co-led investor technical due diligence, demonstrating platform scalability and engineering readiness to support a successful $9M Series A financing round

- Expanded the healthcare platform by integrating 12 insurance partners and onboarding 1,000+ oncologists from leading medical institutions, including UCLA and Mayo Clinic
- Represented the company at TechCrunch Disrupt, World Bio Conference, and Amazon Voice Conference, presenting healthcare technology innovations and pitching to prospective investors
- Partnered with executive leadership to prioritize product roadmaps, evaluate technical trade-offs, and align engineering decisions with strategic business objectives
- Managed and mentored a cross-functional team of 4 software engineers and 4 data scientists, driving technical execution, professional development, and collaboration across engineering and machine learning initiatives
- Established partnerships with international pharmacies to support access to FDA-approved medications, expanding the company's healthcare service capabilities

Sr. Software Engineer *May 2018- Oct. 2018*

- Built and patented a neural machine translation (NMT) system for medical records using PyTorch, achieving a 33 BLEU score while leading a team of 4 data scientists
- Designed and developed an EHR-integrated telemedicine platform supporting 800+ physicians and delivering virtual care to over 1,200 patients
- Mentored junior engineers, resolved technical blockers, and accelerated new-hire onboarding through hands-on technical guidance and knowledge sharing

Davis & Gilbert LLP, New York, NY

Software Developer *Feb. 2015- May 2018*

- Developed and automated enterprise approval workflows, eliminating manual processes and reducing external consulting costs by over $500K
- Designed, developed, and launched the firm's first mobile timekeeping application, increasing attorney productivity by 80%
- Rearchitected and modernized the firm's SharePoint platform, increasing daily active users from 15 to 120 through improved usability and system performance

ACCOMPLISHMENTS/ SPEAKING ENGAGEMENTS/ COMPUTER SCIENCE JUDGE

- **ELC Annual 2026 Host**- Hosted an executive leadership session on evaluating AI tools for enterprise-wide adoption and implementation
- **Judging Panel**- Universiti Sains Malaysia, evaluating student technology innovations at PIXEL 2024–2025 and Varsity AI Hackathon 2025–2026
- **ELC Annual 2025 Hackathon**- Awarded Best User Personalization & Use of AI image generation web app
- **Keynote Speaker**- IIA North Jersey, delivering a presentation on cybersecurity, HIPAA compliance, and healthcare data protection
- **Startup Accelerators**- Participated in the U.S. Air Force Research Laboratory innovation program and TechCrunch Disrupt Startup Alley, showcasing emerging healthcare technologies
- **Techstars Startup Weekend COVID-19**- Ranked among the top 10 teams nationwide out of 1,000+ competing teams for developing an innovative technology solution
